

Blanco Flash Media Edition permanently removes data from various solid-state removable storage media. It is easy to install, extremely user friendly and 100% secure. Designed to give clients full control of their data, Blanco Flash Media Edition is capable of simultaneously erasing multiple devices and conforms to recognised international erasure standards.

BENEFITS

- Blanco Flash Media helps you to comply with company policies and local legislation and ensures that your information is properly erased before you dispose of digital storage media.
- Effectively wipes any information stored on the media, thereby providing a 100% secure erasure of most solid-state removable storage media supported by Microsoft Windows.
- Easy-to-use graphical interface.
- Erasure station option for erasing a large number of USB sticks and SD cards simultaneously .

KEY FEATURES

- Erases any type of flash based removable storage media supported by Microsoft Windows.
- Supports automatic formatting after erasure (NTFS).
- Supports a number of well-known erasure algorithms, and is also capable of using the one your company policy dictates.
- Available in multiple languages.
